

EASYBar[®]
Kiln Tire Bore Lubricant

EASY BAR[®] SP

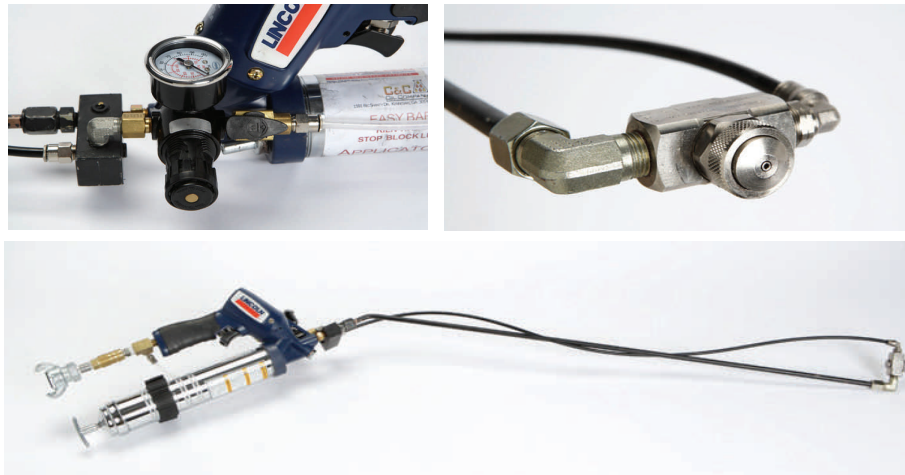

KILN TIRE BORE LUBE

Easy Bar[®] SP Kiln Tire Bore Lube Spray is designed to lubricate hard-to-reach filler bars and riding rings or where kilns are operating at a speed where typical Easy Bar application is difficult. Easy Bar SP has a high auto-ignition point for safe application and can lubricate you kiln tire in just ONE revolution at each pier.

To apply Easy Bar[®] SP Synthetic Spray Lube, insert tube into Applicator Gun 25-T (pictured below). The Applicator Gun which is pneumatically operated comes with a wand ranging from 1' to 6' in length based on your specifications. No mixing or preparation time is wasted unlike antiquated water and graphite concoctions.

- Reduce your workers' exposure to hostile environments.
- Increase worker productivity.
- Protect and enhance the life of your kiln while lowering maintenance costs.
